

**Solenoid SIN60V
 to VDE 0580
 Plug plate to ISO 4400 / DIN 43650
 Protection class IP65**

DESCRIPTION

The SIN60V is a switching solenoid. Its design corresponds to VDE standard 0580. The steel housing is zinc coated as a standard. Static pressure tightness is 160 bars. All o-rings are Viton. The solenoids are fixed to the valve with four screws. Depending on the intended use, the solenoid can be supplied with a plug screw, or with integrated manual override. The connector plate corresponds to ISO 4400 and DIN 43650.

FUNCTION

When the solenoid is energised with the specified nominal voltage, the armature moves from the starting position of its stroke ($s=8,5$ mm) to the end position ($s=0$ mm). The switching time is essentially dependent on the application. The power-stroke characteristics are designed to suit the requirements of hydraulic valves. AC versions include an electronic rectifier integrated into the connector plate. In this way maximum performance is assured.

APPLICATION

Essential for hydraulic directional and poppet valves. Because of the risk of overheating, the solenoid must never be used separately. The length of the fixing screws depends on the base material of the body. An o-ring is used for the valve seal. Information on screws and o-rings will be found in the data sheets relating to the valves concerned. Before changing the plug screw or the screw with integrated manual override, care must be taken to ensure that the solenoid is not under pressure. Risk of injury! The maximum operating pressure is determined by the valve actually used.

CHARACTERISTICS

Static pressure tightness	160 bar (seal diameter of valve max. 32 mm)
Coil winding insulation class	H
Connection/Power supply	Over device plug connection to ISO 4400/DIN 43650, (2P+E), other connections on request
Protection class EN 60 529	IP65
Relative duty factor	100%
Reference temperature	50 °C
Seal	Viton, other on request
Fluid	Mineral oil, other fluid on request
Switching cycles	15 000/h
Mounting screws	4 x M6 (Quality 8.8)
Housing	Zinc coated steel housing, other surface treatments on request.

PERFORMANCE

F = f (s) Force-stroke characteristics

1: U = 100 % U_N Reference temperature = 20 °C (40W)
 2: U = 90 % U_N Reference temperature = 50 °C
 Solenoid in operating temperature (25W)

The values refer to U_N = 24 VDC.
 With other nominal voltages deviations can occur.
 For curve 2 the solenoid has been mounted on a body □ 62x93.
